

App – tayyor ko‘rinish, foydalanuvchilarga tarqatiladi.

Free – sharing yo‘q.

Pro – sharing/teaming.

Premium/PPU – katta dataset, advanced refresh.

6) **Pro yo‘qlarga report berish**

Premium workspace orqali.

7) **Semantic model (dataset) nima?**

Ma‘lumot modeli.

Service’dagi workspace’da saqlanadi.

8) **Scheduled Refresh**

Ma‘lumotni avtomatik yangilaydi (8/48 marta).

On-premise bo‘lsa — Gateway kerak.

9) **Dataset vs Dataflow**

Dataset – model + measures.

Dataflow – Power Query bulutda, qayta ishlatiladi.

10) **Qachon dataflow ishlatiladi?**

Bir nechta report bir xil ma‘lumotni ishlatlsa.

11) **Dashboard nima?**

Bitta sahifa, faqat Service’da.

Report – ko‘p sahifa.

12) **Dashboardga pin qilish**

Report → Visual → **Pin**.

13) **Mobile view**

Telefon uchun moslangan tartib.

14) **Paginated report**

Print uchun uzun/katta jadval reportlar.

Report Builder’da yaratiladi.

15) **PDF yoki PowerPointga eksport**

Service → Export → PDF / PPT.

16) **Live Connection**

Datasetga to‘g‘ridan-to‘g‘ri ulanish, cache yo‘q.

17) **Row-Level Security (RLS)**

Foydalanuvchi faqat o‘ziga tegishli satrlarni ko‘radi.

Desktop → Roles → Publish → Security’da user qo‘shish.

18) **RLS test qilish**

Dataset → Security → **View as role**.

19) **Power BI App**

Workspace’dagi kontentdan yaratiladi.

Create App → Publish.

20) **Enterprise foydalari**

Sharing, collaboration, security, auto-refresh, large models.
